avinashshrivastav77068@gmail.com

OBJECTIVE

Motivated React Developer with hands-on experience in building scalable, reusable, and high-performance web applications using React.js, Redux, and REST APIs. Seeking an opportunity to contribute to innovative projects and enhance user experience while expanding my technical expertise.

SKILLS

React Js

Node Js

Express Js

JavaScript

git , GitHub

mongo db, MySQL

bit bucket

Tailwind css, css3, scss, bootstrap css

HTML, HTML5

swagger

EXPERIENCE

12 06 2024 - 3 02 2025

Frontend Developer

Ubicq Innovation software private limited

Designed, developed, and maintained responsive web applications using React.js, JavaScript (ES6+), HTML5, and CSS3, ensuring cross-browser and cross-device compatibility. Built and optimized reusable UI components, implemented state management (Redux/Context API), and integrated RESTful APIs to deliver high-performance, scalable, and user-friendly web solutions.

5/02/2025 -

SDE1

prompthire.ai

Built the frontend of an AI-powered interview platform using React.js, creating responsive UI components, integrating APIs, and optimizing performance for a seamless user experience.

PROJECTS

oyofi finance

Duration:3 months , Team
Size:3

Frontend developer

I work on the frontend of a crypto wallet, focusing on Ethereum and Binance Smart Chain. My responsibilities include building a user-friendly UI, integrating APIs to fetch balances, tokens, and transaction history, and adding wallet connect features like MetaMask support. I also ensure smooth network switching between Ethereum and Binance, while keeping the application responsive, secure, and easy to use.

Hey crypto

Duration:4 months, Team
Size:3

Frontend Developer

I work on the frontend of a crypto wallet, focusing on Ethereum and Binance Smart Chain. My responsibilities include building a user-friendly UI, integrating APIs to fetch balances, tokens, and transaction history, and adding wallet connect features like MetaMask support. I also ensure smooth network switching between Ethereum and Binance, while keeping the application responsive, secure, and easy to use.

AgentYuga

Frontend Developer

Team Size:5

I created an admin panel that allows managing all user data with features like authentication, role-based access, user CRUD operations, and analytics. Alongside this, I built a complete website for Prompthire, including a landing page, login/signup system, and integrated modules for user interaction. Through this project, I learned a lot about frontend development with React and TailwindCSS, backend integration using Node.js/Express, database handling with MongoDB/MySQL, and deploying applications on modern cloud platforms.

Revv.co.in

Team Size:5

Frontend Developer
Contributed to the development and enhancement of Revv’s car rental platform by building and maintaining responsive user interfaces using React.js, JavaScript (ES6+), HTML5, and CSS3. Implemented reusable UI components, integrated REST APIs, optimized website performance and SEO, and ensured cross-browser/device compatibility to deliver a smooth booking experience for customers.
